tional application No. PCT/GB2004/001770

Box II	Observations where certain claims were found unsearchable (Continuation of Item 2 of first sheet)
	, and an
This Intern	national Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:
1. 🔲 🖁	Claims Nos.: pecause they relate to subject matter not required to be searched by this Authority, namely:
b a	Claims Nos.: 20, 21 secause they relate to parts of the International Application that do not comply with the prescribed requirements to such in extent that no meaningful International Search can be carried out, specifically: See FURTHER INFORMATION sheet PCT/ISA/210
b	claims Nos.: ecause they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).
BOX III O	Observations where unity of invention is lacking (Continuation of item 3 of first sheet)
This Intern	ational Searching Authority found multiple inventions in this international application, as follows:
	·
1. As	s all required additional search fees were timely paid by the applicant, this international Search Report covers all earchable claims.
2. As	s all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment any additional fee.
3. As	s only some of the required additional search fees were timely paid by the applicant, this international Search Report evers only those claims for which fees were paid, specifically claims Nos.:
4. No res	o required additional search fees were timely paid by the applicant. Consequently, this international Search Report is stricted to the invention first mentioned in the claims; it is covered by claims Nos.:
Remark on	Protest The additional search fees were accompanied by the applicant's protest. No protest accompanied the payment of additional search fees.

FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

Continuation of Box II.2

Claims Nos.: 20, 21

These claims do not specify the features to be protected but refer to the description and the drawings. Hence, the features to be searched are not clear.

The applicant's attention is drawn to the fact that claims relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure. If the application proceeds into the regional phase before the EPO, the applicant is reminded that a search may be carried out during examination before the EPO (see EPO Guideline C-VI, 8.5), should the problems which led to the Article 17(2) declaration be overcome.
